The Manisean Account

After reading Giovanni da Verrazzano's account of his contact with the Manisean Indians, it is clear that the tribe had never come into contact with a European Explorer before. Further, it is clear that the account is biased and reflects a Euro-centric perspective of Native Americans. Your task is to create a 1 to 3 page essay describing the European encounter from the Manisean perspective. Be sure to include the physical descriptions of the explorers, technology, culture and customs in your description.
